Address: 2 Sam Sing Street, Waterloo 2017, Australia **Phone number:** +61 411 687 587

Email address: arulsaxena9596@gmail.com **LinkedIn:** <https://www.linkedin.com/in/arul-saxena/>

Overview: MS-Computer Sci @ University of Sydney || DevOps || AWS || Cloud || IAC || Applied AI || Python

Profile

I am a **Computer Science master's student** with a background in cloud **DevOps**, **infrastructure automation**, and **emerging AI systems**. Prior to this, I worked at **EY GDS (Ernst & Young)** for **over 4 years**, where I contributed to building **scalable cloud solutions**, **automation frameworks**, and **generative AI initiatives** across client and internal projects. I bring hands-on experience across **AWS** and **Azure**, with a strong foundation in **Python**, **Terraform**, and modern **DevOps** practices, and was recognized with **multiple Spot Awards** for exceptional performance and impact-driven contributions.

Work Experience

Technical Lead

EY

📅 01/2025 – 12/2025 📍 Gurugram, Haryana, India

- Led the development of scalable **Python-based services on AWS**, automating **infrastructure provisioning** using **Terraform** across **EC2, S3, IAM, and VPC**, and implementing **reusable CI/CD pipelines** with **GitHub Actions** to standardize deployments.
- Additionally, built an internal **LLM-powered** solution using **Microsoft Semantic Kernel** and **LangChain** to automate Terraform module generation.
- Reduced **manual provisioning effort by 40%**, improved deployment consistency, and accelerated infrastructure development through AI-driven automation.

Senior Software Engineer

EY

📅 04/2024 – 01/2025 📍 Gurugram, Haryana, India

- Automated **AWS cloud deployments** and **enhanced infrastructure observability** by provisioning resources with Terraform and **building reporting workflows** using **Python** and **AWS Lambda**.
- Implemented a **metrics-driven solution** to track enterprise adoption of standardized Terraform modules, replacing manual reporting processes.
- **Reduced reporting effort by 40% and increased** standardized module **adoption by 30%**, strengthening governance and infrastructure consistency across teams.

Software Engineer

EY

📅 10/2022 – 04/2024 📍 Gurugram, Haryana, India

- Supported enterprise **AWS** and **Azure** account **migrations** following company separation by contributing to **RFP (Request for Proposal) strategy** and **assessing technical feasibility across large-scale cloud environments**.
- Built a **data-capture framework** and automated AWS environment discovery using **Python** and **AWS Lambda**, while conducting cross-account **migration POCs to evaluate service disruption risks**.
- Reduced manual discovery effort by **50%**, enabled data-driven migration planning, and proactively identified high-risk services to ensure a smoother account transition.

Associate Software Engineer

EY

📅 06/2021 – 10/2022 📍 Chennai, Tamil Nadu, India

- Led the standardization of secure Infrastructure-as-Code practices by **developing** and **maintaining** an **internal Terraform module library** aligned with industry security standards.
- Implemented **static code and policy scanning** using **KICS, tfsec, Checkov, and Wiz**, and built **AWS-based CI/CD pipelines to validate and deploy modules consistently**.
- Reduced misconfiguration risks by **35%**, strengthened infrastructure security posture, and accelerated secure cloud deployments across teams.

Work Experience

Technical Associate (ML and Data Science)

Microsoft Student Partners Club-SRMIST

📅 02/2019 – 10/2020 📍 Chennai, India

- Strengthened peer learning within the **Microsoft Student Partner Club** by **organizing** and facilitating **beginner-to-advanced AI/ML coding workshops** and **mentoring members in core programming** and **machine learning concepts**.
- Collaborated on **applied AI projects**, including developing a restaurant recommendation system using machine learning models.
- **Increased student engagement in AI/ML initiatives**, enhanced practical coding proficiency across the club, and successfully delivered predictive solutions as part of hands-on learning projects.

Education

The University of Sydney | Masters

Computer Science

📅 02/2026 – present 📍 Sydney, Australia

Computer Science and Engineering | Bachelor of Technology

SRM University

📅 01/2017 – 01/2021 📍 Chennai, India

- Focused on Python, applied machine learning, and AI, with hands-on experience in data analysis and model development.
- **Final-year project** involved building a **crop production prediction system** using historical agricultural datasets, leveraging NumPy and Pandas for analysis and deploying the model via Streamlit for interactive insights.
